

Angles - Acute, Obtuse, Right or Straight - First Time

1

In geometry, what's the name for an angle that's less than 90°

A	B
Acute	Abacus

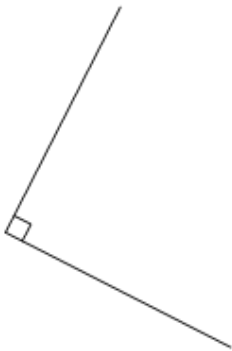

2

In geometry, what's the name for an angle that's equal to 180°

A	B
Straight	Sextant

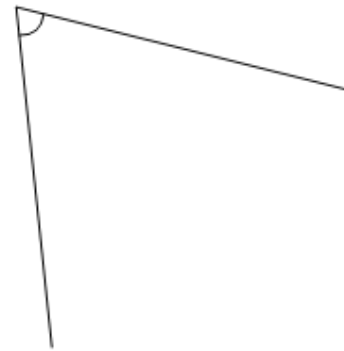

3

In geometry, what's the name for an angle that's equal to 90°

A	B
Right	Rheumatoid

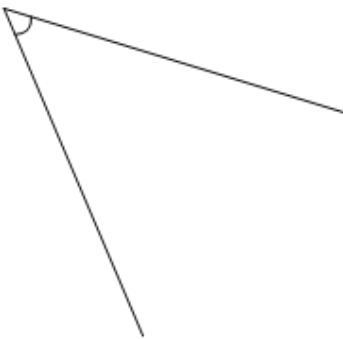

4

In geometry, what's the name for an angle that's less than 90°

A	B
Amethyst	Acute

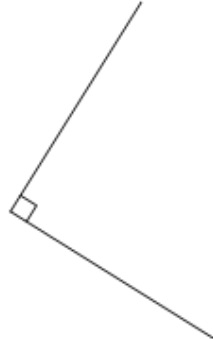

5

In geometry, what's the name for an angle that's less than 90°

A	B
Alternative	Acute

6

In geometry, what's the name for an angle that's equal to 90°

A	B
Revelry	Right

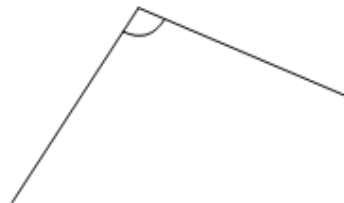

7

In geometry, what's the name for an angle that's equal to 180°

A	B
Straight	Sophomore

8

In geometry, what's the name for an angle that's more than 90°

A	B
Obtuse	Orange
