

Area of a Simple Shape Formula - Formula to Shape Name

1 What shape's area would this formula calculate? $\frac{\text{base} \times \text{height}}{2}$ <table><tr><td>A</td><td>Rectangle</td><td>B</td><td>Square</td></tr><tr><td>C</td><td>Triangle</td><td></td><td></td></tr><tr><td></td><td></td><td></td><td></td></tr></table>	A	Rectangle	B	Square	C	Triangle							2 What shape's area would this formula calculate? $\text{length} \times \text{width}$ <table><tr><td>A</td><td>Triangle</td></tr><tr><td>B</td><td>Rectangle</td></tr></table>	A	Triangle	B	Rectangle
A	Rectangle	B	Square														
C	Triangle																
A	Triangle																
B	Rectangle																
3 What shape's area would this formula calculate? $\text{side} \times \text{side}$ <table><tr><td>A</td><td>Triangle</td></tr><tr><td>B</td><td>Square</td></tr></table>	A	Triangle	B	Square													
A	Triangle																
B	Square
