

Fraction Manipulation Algebra - All

1 Solve the fraction for 'x' in terms of the variables and reduce.

A $x = b \cdot e$

B $x = \frac{e}{b}$

$$b = \frac{x}{e}$$

C $x = \frac{b}{e}$

3 Solve the fraction for 'x' in terms of the variables and reduce.

A $x = \frac{f}{d}$

B $x = \frac{d}{f}$

$$d = \frac{x}{f}$$

C $x = d \cdot f$

5 Solve the fraction for 'x' in terms of the variables and reduce.

A $x = a \cdot b$

B $x = \frac{b}{a}$

$$a = \frac{x}{b}$$

C $x = \frac{a}{b}$

7 Solve the fraction for 'x' in terms of the variables and reduce.

A $x = \frac{a}{f}$

B $x = \frac{f}{a}$

$$a = \frac{f}{x}$$

C $x = a \cdot f$

2 Solve the fraction for 'x' in terms of the variables and reduce.

$$c = \frac{x}{f}$$

A $x = \frac{c}{f}$

B $x = \frac{f}{c}$

C $x = c \cdot f$

4 Solve the fraction for 'x' in terms of the variables and reduce.

$$c = \frac{x}{e}$$

A $x = \frac{c}{e}$

B $x = \frac{e}{c}$

C $x = c \cdot e$

6 Solve the fraction for 'x' in terms of the variables and reduce.

$$d = \frac{g}{x}$$

A $x = \frac{g}{d}$

B $x = d \cdot g$

C $x = \frac{d}{g}$

8 Solve the fraction for 'x' in terms of the variables and reduce.

$$b = \frac{x}{d}$$

A $x = \frac{d}{b}$

B $x = \frac{b}{d}$

C $x = b \cdot d$
