

## Scientific Notation - Dividing Normalized Numbers (0 Decimal Place)

1 Solve the equation by dividing numbers that are almost in scientific notation

$$\frac{(3 \times 1,000,000)}{(1 \times 1,000)}$$

- |   |                    |   |                   |
|---|--------------------|---|-------------------|
| A | $3 \times 1,000$   | B | $3 \times 10,000$ |
| C | $3 \times 1$       | D | $3 \times 100$    |
| E | $3 \times 100,000$ | F | $3 \times 10$     |

2 Solve the equation by dividing numbers that are almost in scientific notation

$$\frac{(6 \times 10,000,000)}{(6 \times 1,000)}$$

- |   |                    |   |                      |
|---|--------------------|---|----------------------|
| A | $1 \times 10,000$  | B | $1 \times 1,000,000$ |
| C | $1 \times 100$     | D | $1 \times 10$        |
| E | $1 \times 100,000$ | F | $1 \times 1,000$     |

3 Solve the equation by dividing numbers that are almost in scientific notation

$$\frac{(4 \times 10,000,000)}{(2 \times 10,000)}$$

- |   |                    |   |                   |
|---|--------------------|---|-------------------|
| A | $2 \times 100$     | B | $2 \times 1$      |
| C | $2 \times 100,000$ | D | $2 \times 10,000$ |
| E | $2 \times 1,000$   | F | $2 \times 10$     |

4 Solve the equation by dividing numbers that are almost in scientific notation

$$\frac{(9 \times 100,000,000)}{(9 \times 100,000)}$$

- |   |                   |   |                    |
|---|-------------------|---|--------------------|
| A | $1 \times 1,000$  | B | $1 \times 1$       |
| C | $1 \times 10$     | D | $1 \times 100$     |
| E | $1 \times 10,000$ | F | $1 \times 100,000$ |

5 Solve the equation by dividing numbers that are almost in scientific notation

$$\frac{(7 \times 100,000,000)}{(7 \times 100,000)}$$

- |   |                   |   |                    |
|---|-------------------|---|--------------------|
| A | $1 \times 100$    | B | $1 \times 1$       |
| C | $1 \times 10$     | D | $1 \times 1,000$   |
| E | $1 \times 10,000$ | F | $1 \times 100,000$ |

6 Solve the equation by dividing numbers that are almost in scientific notation

$$\frac{(8 \times 100,000,000)}{(2 \times 1,000)}$$

- |   |                      |   |                       |
|---|----------------------|---|-----------------------|
| A | $4 \times 10,000$    | B | $4 \times 100$        |
| C | $4 \times 100,000$   | D | $4 \times 1,000$      |
| E | $4 \times 1,000,000$ | F | $4 \times 10,000,000$ |

7 Solve the equation by dividing numbers that are almost in scientific notation

$$\frac{(8 \times 100,000,000)}{(4 \times 10,000)}$$

- |   |                      |   |                   |
|---|----------------------|---|-------------------|
| A | $2 \times 100$       | B | $2 \times 10,000$ |
| C | $2 \times 1,000,000$ | D | $2 \times 10$     |
| E | $2 \times 100,000$   | F | $2 \times 1,000$  |

8 Solve the equation by dividing numbers that are almost in scientific notation

$$\frac{(9 \times 1,000,000,000)}{(1 \times 100,000)}$$

- |   |                      |   |                  |
|---|----------------------|---|------------------|
| A | $9 \times 10,000$    | B | $9 \times 1,000$ |
| C | $9 \times 1,000,000$ | D | $9 \times 100$   |
| E | $9 \times 100,000$   | F | $9 \times 10$    |
