

Statistics Data Organization - Data Collection Method to Disadvantage

<p>1</p> <p>Which of these is a disadvantage of using a phone survey?</p> <p>a phone survey</p>	<p>2</p> <p>Which of these is a disadvantage of using a focus group?</p> <p>a focus group</p>		
<p>A Always produces less accurate data than guessing</p>	<p>B Can be expensive with many respondents</p>	<p>A Only works when all responses are anonymous</p>	<p>B Cannot collect opinions or reactions</p>
<p>C Cannot ask follow-up questions at all</p>	<p>D Only works for people in the same building</p>	<p>C Findings may not generalize well</p>	<p>D Requires every population member to attend</p>
<p>3</p> <p>Which of these is a disadvantage of using an in-person interview?</p> <p>an in-person interview</p>	<p>4</p> <p>Which of these is a disadvantage of using administrative records?</p> <p>administrative records</p>		
	<p>A Respondents may feel pressure to answer politely</p>		<p>A Data may have been collected for another purpose</p>
	<p>B Prevents researchers from clarifying questions</p>		<p>B Only works for collecting opinions</p>
	<p>C Only works for measuring weather conditions</p>		<p>C Cannot include large amounts of information</p>
	<p>D Cannot collect detailed explanations from people</p>		<p>D Always requires new interviews with respondents</p>
<p>5</p> <p>Which of these is a disadvantage of using direct measurement?</p> <p>direct measurement</p>	<p>6</p> <p>Which of these is a disadvantage of using an exit survey?</p> <p>an exit survey</p>		
<p>A Cannot be used for numerical variables</p>	<p>B Only works when people volunteer answers</p>	<p>A Only works before the experience happens</p>	<p>B Cannot collect feedback about recent experiences</p>
<p>C Always depends on respondent memory</p>	<p>D May require special equipment</p>	<p>C Responses may reflect only one visit</p>	<p>D Always excludes people who used the service</p>
<p>7</p> <p>Which of these is a disadvantage of using an online survey?</p> <p>an online survey</p>	<p>8</p> <p>Which of these is a disadvantage of using an experiment?</p> <p>an experiment</p>		
<p>A Respondents may misunderstand questions without help</p>	<p>B Cannot collect opinions from large groups</p>	<p>A Never supports cause-and-effect conclusions</p>	<p>B Cannot compare different treatments</p>
<p>C Only works when all questions are numerical</p>	<p>D Always requires researchers to visit respondents</p>	<p>C Only works when no variables are controlled</p>	<p>D May be expensive or difficult to run</p>
